

ARCIC Vision

The Army Capabilities Integration Center (ARCIC) is the Army's leader in the identification, design, development, and synchronization of capabilities into the Army current Modular Force and the future Modular Force, bringing together all the Army agencies as well as Joint, Multinational and other DoD agencies to manage rapid change. The ARCIC supports TRADOC in providing adaptive Soldiers, leaders and units by contributing to the development of doctrine, TTPs, and the collective training experience. Our measure of success is a campaign quality Modular Force with joint and expeditionary capabilities.

Army Capabilities Integration Center

US Army Training and
Doctrine Command

ARCIC

Mission

The Army Capabilities Integration Center designs, develops, integrates and synchronizes force capabilities for the Army across the DOTMLPF imperatives into a Joint, Interagency, and Multinational operational environment from concept through capability development.

Directorates

Capabilities Development

- Leads the rapid development and integration of capabilities to enhance the current and future Modular Force
- Identifies and validates technology solutions to address current and future capability gaps
- Identifies and integrates training and leadership capabilities to support the future Modular Force

Requirements Integration

- Ensures the Army fields the future Modular Force with Joint integrated capabilities
- Serves as the integrator of integrators by tracking all DOTMLPF capabilities from the current to the future Modular Force
- Ensures integration between the current and future Modular Force

Architecture Integration Management

- Maintains collaborative integrated operational architecture environment
- Validates operational architectures for the current and future Modular Force
- Provides operational architectural support to combat developments

Concept Development & Experimentation

- Develops Joint and Army operational concepts to lead the process of change in the Army
- Captures ideas and develops analytically concepts through future studies, wargaming, and experimentation
- Adapts Army concept and capability development planning to capture near-term prototype opportunities

ARCIC Forward

- Leads ARCIC strategic engagement efforts to support developing the Modular Force
- Serves as the bridge between ARCIC and HQDA, DoD, Sister Services, Joint Staff, and other stakeholders in the National Capital Region

International Army Programs

- Coordinates and synchronizes TRADOC multinational activities at home and abroad to enhance international cooperation

Key Objectives

- Lead Innovation
- Explore and Experiment
- Develop the future Modular Force
- Integrate the Force
- Strengthen Joint, Interagency, and Multinational Capabilities
- Reshape Capabilities Development
